

# LEARNING MANAGEMENT SYSTEMS

## Using Learning Management Systems to Support Blended and Online Learning

### Shareables

**Goal:** Maximize learning opportunities by utilizing accessible learning resources

- Videos (self-made or from the internet)
- Interactive presentations
- Documents
- Links to external resources
- Embedded external tools (e.g., EDPuzzle, Nearpod, Quizlet, Kahoot, and Google tools)

#### Tips

- Establish clear expectations and requirements
- Make learning materials available gradually
- Organize course content into units or modules

---

### Three-Way Communication

**Goal:** Model effective communication by providing thorough information on class expectations and feedback

- Announcements
- Individual and group emails
- Feedback on assignments

#### Tips

- Ensure students know how to turn on LMS notifications
- Refer to students by name
- Establish routines for consistent communication

---

### Assessment & Data Tracking

**Goal:** Utilize diverse forms of assessments to analyze students' academic growth

- Homework, quizzes, exit tickets, and projects
- Assignment management for tracking student progress
- Gradebook capabilities

#### Tips

- Develop assessments that can be automatically graded
- Utilize rubric features for feedback
- Utilize the LMS grading feature to provide feedback
