

Copyright and Fair Use

3 Ways to Get Materials for Use in the Classroom

Copyrighted Materials

Fair use allows teachers and students to make limited use of copyrighted materials as part of the teaching and learning process if your use aligns with the following **4 factors**:

- only small amounts of the original are used
- the material being used is factual
- your use differs from the original use
- your use will not harm sales of the original

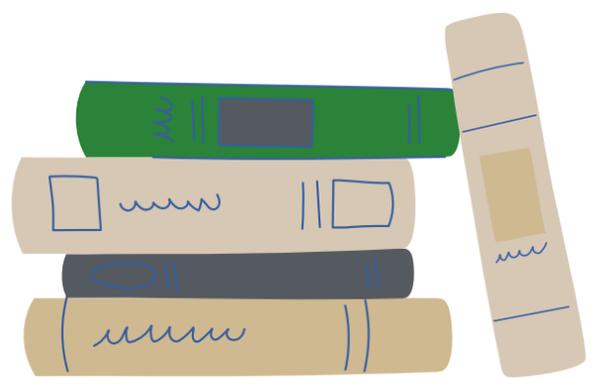

If in doubt, contact the copyright holder to ask permission to use the materials.

Public Domain

Public domain materials are free to use, such as

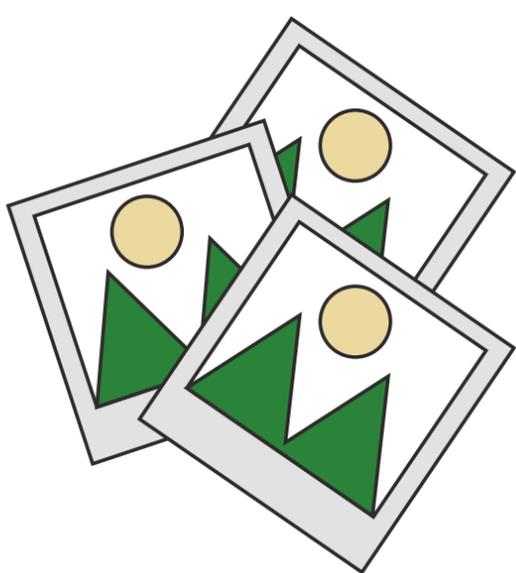

- Works created prior to 1925
- U.S. government works
- Selective materials released by authors
- Freely usable clip art can be accessed on openclipart.org.

Creative Commons

Creative Commons licenses materials for non-commercial uses with certain use requirements, sometimes only author attribution.

- Filter search engine results by Creative Commons license to find materials.
- Sites like photosforclass.com and picsforlearning.com have images for education.
- Search photo sites like pixabay.com, pexels.com, and unsplash.com for images usable under Creative Commons licenses.

If in doubt, it is *always* best to give the author of the materials credit and confirm whether the license has some stipulations.
