

# Assessment in Blended and Online Learning

## Formative Assessment in Online Environments

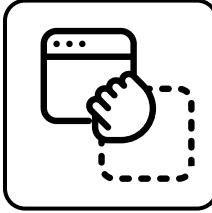

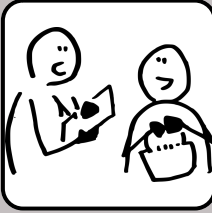

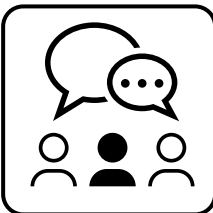

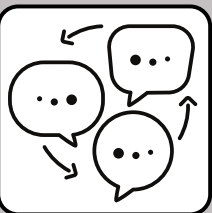

**Formative assessments** aim to monitor and improve students' learning during a lesson or unit of study. There are both formal and informal means of facilitating formative assessments.

<b>INFORMAL STRATEGIES</b>					
	<b>Online Polls</b>	<b>Game-based Activities</b>	<b>Peer Evaluation and Review</b>	<b>Self-Assessment</b>	<b>Learning Journals</b>
	Elicit <b>opinions</b> or responses through polls. Polls can also be a useful tool to gather instructional <b>feedback</b> , identify student <b>interests</b> , and share <b>experiences</b> .	Increase student engagement in learning content via <b>gamified</b> learning activities and friendly <b>competition</b> . Game responses and records can <b>inform needed support</b> .	Include peer discussion and evaluation to enhance learning experiences. It is important to help <b>scaffold</b> students on how to provide kind and helpful feedback to their peers.	Self-assessment can prompt <b>deeper-level learning</b> and reveal details about the learning experience. It is important to provide support to students as they self-assess.	Journaling about learning is beneficial in providing insights about students' <b>meta-cognitive abilities</b> . It also allows students to process their learning.

### Informal ↔ Formal

Though these strategies are organized by **recommended categories**, there are many instances where **informal** strategies can be used as a **formal** strategy and vice versa.

### What other online assessment strategies have you used?

<b>FORMAL STRATEGIES</b>					
	<b>Online Quizzes</b>	<b>Drag n' Drop</b>	<b>Interviews</b>	<b>Dialogue Simulations</b>	<b>Forum Posts</b>
	Utilize multiple means (ex. multiple choice, fill-in-the-blanks, and labeling) to assess students. This process also provides <b>efficient</b> and <b>immediate</b> feedback.	Allow students to demonstrate their knowledge through <b>identification</b> , such as dragging the parts of a plant cell or the sequencing of Shakespeare acts.	Teacher-to-peer or peer-to-peer interviews can be conducted to have <b>students share</b> their learning or lived experiences.	Students can engage in <b>real-world scenarios</b> in a <b>low-stakes</b> environment through dialogue simulations, such as determining the appropriate culinary skills to complete a cuisine.	Discussion forums, video and written, can be utilized to have students respond and <b>reflect</b> on prompts or case studies. They can also be used to connect students and facilitate <b>collaboration</b> .
